Parcel No. 2. Nevada Rawhide Mining Company.
Pyramid Mine.
Located 32 miles south of Fallon, Nevada, in Sec. 10, T. 15 N., R. 29 E which is in the Holy Cross Mining District in Churchill County.

The property consists of 6 unpatented claims and they were first staked in 1870. Through the years several hundred feet of tunnels and open stopes have been dug. From 1953 to 1955 a small mill produced about 14 tons of concentrates that averaged 1,230 oz. of silver per ton.

Mr. Tedrow reports that the pattern of mineral deposition is erratic and that the minerals occur in knife blade slams in a vein 8 feet wide. He recommends further sinking of the shaft and stoping as well as a drilling program. There is no water available at the mine.

Report: These properties would be of no value to the Hughes Tool Company at the present time.

Respectfully,
[s] Bunker
Memorandum.

To: Mr. A. J. Anderson

From: L. Bunker

Date: November 13, 1970

Subject: Mining Property for sale. Two parcels.

Agent: Mine Service Corporation
J. Bruce Parsons, Vice President
East 1711 Trent
Spokane, Washington 99202
(The original correspondence was to Mr. John Meier of Hughes Tool Company. There is nothing on file in relation to these properties.)

Consulting Engineer and Geologist for both properties, Mr. Clive E. Tedrow.

The property is located about 42 miles easterly of Riggins, Idaho. This is a high rough country, not accessible in winter months because of snow.

Property consists of 1 patented claim and 10 unpatented lode claims. The tunnels on the patented claim have caved in. Supposedly there is a vein with high values in silver. A stock company has been formed and they are selling shares. The company reports they are in a position
