

0040 0003

NAME OF PROPERTY

D-1

Ski-Hi Tungsten Group

Peter Fox, 113 Mount Rose Street, Reno, Nevada, owner

? Douglas Co.  
Item 6

LOCATION

Western Douglas County in Sweetwater Range.

GEOLOGY

The mineralized area covers a limestone reef flanked by granite and schist. Tactite occurs in irregularly spaced bunches along the strike of the limestone, which dips almost vertically. Scheelite occurs in crevices and joint planes

in the tactite near the surface, and disseminated in fine grains in the more solid, compact portions.

DEVELOPMENT

Consists of a few open-cuts and trenches on the surface. Samples indicate an average WO<sub>3</sub> content of .25%. No tonnage estimates made.
