

0080 0047

PROPERTY NAME: Slater Mine

OTHER NAMES:

MINERAL COMMODITY(IES): Hematite and possible gold?

TYPE OF DEPOSIT: Quartz veins

ACCESSIBILITY: Very poor roads steep and washed.

OWNERSHIP: Unknown

PRODUCTION: Unknown

HISTORY: Old cabin..workings are caved.

County: Humboldt

Item 4

Mining District: Unnamed

AMS Sheet: Vya

Quad Sheet: Trident Peak 15'

Sec. 6 T 45N R 32E

Coordinate (UTM):

North | | | | | m

East | | | | | m

Zone

DEVELOPMENT: Old cabin has collapsed, short adits have caved.

ACTIVITY AT TIME OF EXAMINATION: None nor has there been any for a long time.

GEOLOGY: Quartz veins with minor hematite and iron staining hosted in a deeply weathered granodiorite. If there is any mineralization it was not apparent. The workings and the dump hardly make it a prospect. Sample 2390 was from the dump.
