00	PROPERTY NAME: Hydrargyrum (51) Claims	Humbaldt TI
	- 1 1 /-	County: Humboldt Hein
		Mining District: Un-organized Bott
	MINERAL COMMODITY(IES): Mercury, gold volcanogenic	AMS Sheet: Vya
T	YPE OF DEPOSIT:Volcanogenic	Quad Sheet: Quinn River Cross
А	ACCESSIBILITY: See topo sheet.	Unsurveyed 15 Sec, T 42N , R 33
0'	WNERSHIP: Asarco, Inc./Tom Lawson	Coordinate (UTM):
	RODUCTION: Small to none.	North 4 6 0 0 1 0 0 n
	Sistory: Not known	East 0 3 9 2 1 15 0 n
_	notoni.	Zone <u>11</u>
D	EVELOPMENT: See last part of "Activity".	
_	ACTIVITY ATTIME OF EXAMINATION: Drill rig set up & working in middle of road on Red Arrow Claims. Operatory of the stope connects to drifts below on southerly knob. Trench with open adit/shaft on northerly knob. Minor other dozer cuts between 2 knobs. 2 pipe retort below shaft on side of knob. Northerly knob-3 dozer trenches cut on east side/approximately 100-ft. long X 15 ft. wide. Most northerly of these has an adit running on into hill & shaft at SW corner. Also a small 1 pipe retort is located here.	
	GEOLOGY: Mixture of andesite & rhyolite. Andesite may production here, came from rhyolite. Current drilling appearance of an armost vertical in its continuous drilling appearance.	eare to be in the and-de-
	seemingly is almost vertical in its setting. At northern recontact of andesite/rhyo & indications are that production andesite. Looks like rhyo is the dike with andesite the country reconstruction.	ears to be in the andesite who most working shaft is sunk aloo here, if any, came from
