Zone								+11

DEVELOPMENT: NoneACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Site is small open pit with single caved adit 100 meters south. Workings are in dirty gray/black (MnO<sub>2</sub>) stained siltstone with disseminated vein barite and crystalline pyrolusite. Country rock has pods and lenses of limonite stained chert. Breccias cemented with barite. o/c slightly vuggy, massive gossan, brecciated, vugs lined with chalcedony. Some of fractures has fine crystalline, goldish coating. Also some fine sprays of sulfides. O/C seems to be capping the North side of small knob.

REMARKS: Sample 653Photo 16,17,18, R21.
