PRELIMINARY EXAMINATION REPORT

State Nevada County Lincoln Mineral Products Tungsten

Name of property The Macbruson Property

Owner J. W. Bruce Address Las Vegas, Nevada

Lessee or  
Operator \_\_\_\_\_ Address \_\_\_\_\_

Location Located on the eastern spur of Mormon Range 22 miles from Carp, Nevada.

One sample from channel cut on outcrop assayed 0.03%  $WO_3$ .

One composite sample from pit assayed 1.08%  $WO_3$ .

History and production This property consisting of 26 lode claims was originally located by W. R. Cogart in 1941. It was later acquired from the owner by J. W. Bruce and R. M. Wilson. No ore has been shipped to date.

Type Deposit (Geology) The deposit is in a series of sedimentary rocks, metamorphosed by intruded granite and subsequently by dikes and necks of amphibolites. Much of the bedding has altered to mica schist. Most of the scheelite seen was in the beds of metamorphosed sediments near granite contacts.

Mine Workings None.
