LOCATION

Indian Mining District, Lincoln County, Nevada, about 45 miles from Pioche.

GEOLOGY

Silver, lead, and copper mineralization occurring in thin short lenses having a maximum width of about 4 inches which can be traced at most for only a few feet. In some places a few of these lenses are connected along the strike by an unmineralized tight paper-thin fracture.

DEVELOPMENT

Development consists of a 120-foot adit tunnel following one of these fractures. A 30-foot winze has been sunk below the tunnel floor.

No ore reserves.
