

Groom Mine (5 pat & 11 Lode claims)

0100 0005

MacBruson Property

Bruce Alumina Clay

Charles Culverwall Property

Deer Trail (5 claims)

Tem Piute Tungsten (20 claims)

Comet Coalition Mines

Irish Mountain Manganese

Hulse Manganese

Salt Lake Pioche Mg. Co.

T7S, R56E, 86 mi. W Caliente, Nevada, Groom District, owner - Dan Sheahan. Discovery 1864, intermittent production \$287,000 up to 1944. Paleozoic sediments, deposit on major N trending fault - dips 66°W. U.S.B.M. (2 adits, 2 shafts, approximately 3,500 ft. developed) Lead-Silver.

E spur Mormon Range, 22 mi. from Carp, Nev. owner - J. W. Bruce, Las Vegas. Sediment metamorphosed by intruded granite and subsequently by dikes and necks of amphibolites. U.S.B.M. - no development. Tungsten.

15 mi. SE Carp, Nevada, owner - J. W. Bruce, Las Vegas, Nevada. Intruded sediments with alumina clay outcrops 1,000 ft. in length - iron stained crops but white alumina at depth. U.S.B.M. 1 56 ft. vertical shaft - several small open cuts. Al_2O_3 .

19 mi. NE of Carp, Nevada and 35 mi. W of Bunkerville. Ls sediment include manganese oxides over area about 400 square feet. U.S.B.M. (one 10 ft. shaft on outcrop). Manganese.

S28, T10N, R65E, owner - A. A. Mortenson, Shoshone, Nevada. Cambrian sediments with quartz vein in which wolframite occurs. U.S.B.M. (35 ft. adit and 19 open cuts) Tungsten.

45 mi. NW of Hiko, Nevada, Tempiute District, owner - Thiriot and Goyen. Ls granite contact around stock 1,200 ft. in diameter. U.S.B.M. 2 adits 750 ft. in length connected 90 ft. X cut. Tungsten.

S20, T1N, R66E, Comet District. Deposit lead-zinc-manganese outcrop along base of range. U.S.B.M. 2 incl. shaft. 600 ft. and 2,500 ft. in depth. Lead - Zinc.

15 mi. N.W. Crystal Springs, near Irish Mountain, owner - Brownlow, Gentry. Sediments with fissures cutting them - filled with manganese oxides, calcite and quartz. U.S.B.M. - a few trenches. Manganese.

about 40 mi. NW of Pioche, Atlanta District, owner, James G. Hulse, Pioche. Narrow vein - 8 in. U.S.B.M. shallow test pits. Manganese.

Sec. 23, 24, 25 and 26 T1N, R67E, Pioche District. Deposit is a fissure vein in quartzite, known length 1,200 ft. width 4 ft. and so far 300 ft. deep. U.S.B.M. 2/44 6 shafts from 115' to 270' deep. Lead - Zinc.

(Lincoln County continued)

3 Owen Walker Tungsten Mine

P 14 File A

Patterson district, 50 mi. hwy, $2\frac{1}{2}$ mi. dirt N Pioche. (O. F. Walker owner by quitclaim deed from C. H. Crawford) See U.S.B.M. reports.

4 Cave Valley Mine

P 17

Patterson District, Cave Valley, (P. C. Fraser, 1405 Mill Street, Ely - owner) Since Schrader reports, incline winze sunk in plane of vein below 120 ft. level S., to drift to intersection of Schrader N fault. vein terminates on fault, 35' below old 120' level. See U.N. Bull. #3.

1 Ida-May Mine

P 2

Bristol Range, 14 m. on Rt, 93, and 3 mi. by dirt road NW Pioche, (A. G. Robinson-leaser w/option to pur from A. C. Ellis estate) Series of adits. Copper.

2 Petrulas Mine

P 5

Freiberg District, 66 mi. from Caliente, Petrulas Brothers - owners. Small production worked many years intermittently. Silver, Lead, Zinc.
