Nye County  
N. 5

Item 24

UNITED STATES BUREAU OF MINES

PRELIMINARY EXAMINATION REPORT

State Nevada County Nye Mineral Products Antimony

Name of property King Solomon Mines

Owner M. F. Peterson Address Tonapah, Nevada

Lessee or  
Operator \_\_\_\_\_ Address \_\_\_\_\_

Location Eight claims, located on eastern edge of the Toiyabe National Forest, 45 miles  
northeast of Tonapah.

History and production

Not known.

Type Deposit (Geology)

Principal rocks in the area are rhyolites. Stibnite stringers occur too widely scattered to offer a possibility of mining a large low grade ore body.

Mine Workings The area has been explored by open cuts and 32 foot shaft along a contact of rhyolite and andesite. The contact strikes S. 35 W. and dips 39 E. Stibnite occurs in kidneys and small lenses for a distance of about 200 feet along the contact.
