## NOTES:

Mr. A.P. Anderson, Mgr. Pacific Coast,  
U.S. Smelting Refining & Mining Explor. Co.,  
Los Angeles, California.

WAGNER COPPER MINE  
Esmeralda Co., Nev.

from  
Silver Eagle Resource  
Tucson files

Dear Sir:

This property formerly belonged to Frank -  
who own the Wagner Azurite Copper Group in the Paradise Range,  
Nye Co., Nevada; but control was sold to Geo. Wingfield, J.H.  
Mc Kenzie and others who did considerable work a year or so ago,  
under the direction of Harry Cuttler, one of Wingfield's engineers.

The title of the Company is the "Wagner Copper Mg. Co.",  
2,000,000 shares. Everett claims that Wingfield paid cash for his  
stock, 931,000 shares, and spent about \$40,000.00 in development,  
and I infer that he bought treasury stock, or that Wingfield's  
money was expended in development work, and that his stock there-  
fore cost him 4 or 5¢ per share.

Formation said to be rhyolite and porphyry, in contact  
with underlying limestone, with heavy iron gossan along the con-  
tact; the lime lying rather flat under the rhyolite.

Wingfield sunk a shaft 453 ft. through the overlying  
rhyolite, which showed copper stain down to 370 ft., balance of  
the shaft was through schistose rock. No showing of any conse-  
quence was developed in this shaft. Another shaft 100 ft. deep,  
was sunk circular in form to avoid timbering, this shaft said to  
show copper carbonates in the seams, and glance in the seams at the  
bottom.

Everett claims work was not done in the right part of  
the ground, but my impression, without knowing anything more defin-  
itely of the proposition, is that Wingfield is sick of his bargain,  
for he is doing extensive development throughout Nevada, and if  
he thought anything of this property, he would doubtless want to  
go ahead with the work.

Yours truly,

FAE/S
