

0190 0012

PROPERTY NAME: Tennessee Gulch

OTHER NAMES:

MINERAL COMMODITY(IES): Au

TYPE OF DEPOSIT: Vein, placer

ACCESSIBILITY:

OWNERSHIP:

PRODUCTION:

HISTORY:

County: Elko Item 13

Mining District: Alder

AMS Sheet: Wells

Quad Sheet: Rowland 15'

Sec. 32, T 46N, R 56E

Coordinate (UTM):

North 4 6 3 1 2 5 0 m

East 0 6 0 9 5 0 0 m

Zone +11

UTMs EST.

DEVELOPMENT: Several mines &amp; prospects.

ACTIVITY AT TIME OF EXAMINATION: Not examined.

GEOLOGY: Bushnell (1967) states that location was once active, complete with millsite, which was constructed in 1932.

"Some gold was produced from fissure veins in the Coffeepot stock & placer deposits." According to a postmaster in Rowland (1932), there are two veins on the property, an upper & lower, in granite porphyry which are small but rich in gold.
