Item 13

APPENDIX A--MINERAL PROPERTY DATA FOR MINES AND PROSPECTS IN THE VICINITY
OF THE NELLIS AIR FORCE BASE AND THE NELLIS BOMBING AND
GUNNERY RANGE, CLARK, LINCOLN, AND NYE COUNTIES, NEVADA

Map No. 1

Mine Name: Antelope View

MILS Sequence No.: 3202300234

Location: Sec. 9, T 4 S, R 47 E

County: Nye

Commodity: Gold, Silver

Production: Kral (4) stated that about \$80,000 is purported to
have been produced; the U.S.B.M. has no record of production.

Mining District: Antelope Springs

Geology: The ore occurs in narrow quartz veins in rhyolite. Several
veins extend 2,000 feet or more. Vein anastomosing seems common.

At 85-foot depth, the main vein is about 3 feet wide.

Development: The principal working is a 240-foot inclined shaft
with 240 feet of laterals on the 60-foot level.

Periods of Activity: The property was located in 1906-1907. Mine
development apparently occurred shortly after location.

References: (1, p. 35) 1/ (4, p. 12) (13, pp. 78-79) (17, pp. 87-98)

1/ Underlined numbers in parentheses refer to the list of references at
the end of the main report.
