The Wescord Group

The Wescord Group of companies is comprised of four Nevada partnerships all acting as mining claim holding companies. All of the properties held have been acquired by grass-roots prospecting techniques and without any financial support. The exploration work required has been completed on "weekend" ventures with individual "out of pocket" funding. Each of the individual partners is a qualified geologist with over fifteen years of experience in the exploration and mining industry. The combined practical experience of the present active Wescord partnership exceeds fifty years.

WESCORD GROUP
GENERAL PROPERTY LOCATIONS

PROPERTY: Stallion / Silvercrest / Wedge

LOCATION: T.29 North, Range 32 East; Pershing County, Nevada
Arabia Mining District

TOTAL CLAIMS: 10

TOTAL ACRES: 200

OWNERSHIP: 100% Wescord Resources (prior to sale) *Sold*

STATUS: Purchased from Wescord by R C J Resources

COMMODITIES: Au, Ag, Pb, Sb

TARGET TYPE: Stratabound exhalative system in addition to strong structurally controlled vein systems.

DISCUSSION: The predominant lithology consists largely of dark gray phyllites with occasional interbedded limestones and acidic tuffs. Strong northeasterly striking shear zones cross the central portion of the claim group and have been the focus of much of the past mining activity in the area. The best mineralization is found where the shear zones cut the acidic tuff beds. Mineralization is found in the form of stibnite, plumbojarosite, pyrite, and argentiferous bindheimite. Rock samples taken to date have yielded gold values as high as 0.122 oz/ton and silver values as high as 16.62 oz/ton.
