PROPERTY NAME: BF Claims BALD MOUNTAIN PRO	JECT County: White Pine Hom 19
OTHER NAMES:	Mining District: Bàld Mtn.
MINERAL COMMODITY(IES): Au? Disseminated	AMS Sheet: Ely
TYPE OF DEPOSIT: Disseminated	Quad Sheet: Cold Creek Ranch
ACCESSIBILITY:	Sec. 17/18 , T 24N , R 57E
OWNERSHIP: Placer Amex	Coordinate (UTM):
PRODUCTION: None.	North 4 4 2 4 4 0 0 m East 0 6 2 0 7 5 0 m
HISTORY:	Zone +11
DEVELOPMENT: Numerous drill roads & drill holes, son	me trenching also.
ACTIVITY AT TIME OF EXAMINATION:	
GEOLOGY: Plat shows drill roads on Placer Amex 1	BF claim group altho we noted MP claims
on way upito drill roads.	
The drill roads are quite extensive & o	cover most of section 18 and part of sec. 17
maroon & tan colors. County map shows this is the	rk grey ls beds which weather to Feox, red-b
neighbor.	ne Dunderburg shale or its stratigraphic
A few of the drill roads (no drill hole	es) constructed probably in the last year.
A few of the drill roads (no drill hole	es) constructed probably in the last year. rabbit brush & have drill holes.
A few of the drill roads (no drill hole Most of the other drill roads are overgrown with	rabbit brush & have drill holes.
A few of the drill roads (no drill hole Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limey selectively grabbed from several different locals	rabbit brush & have drill holes. shales, some with calcite veinlets
A few of the drill roads (no drill hold Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limes selectively grabbed from several different local noted.	rabbit brush & have drill holes. y shales, some with calcite veinlets ties within drilled area. Some MnO dendrit
A few of the drill roads (no drill hold Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limey selectively grabbed from several different local noted. Intrusive with quartz phenos & pyrite	rabbit brush & have drill holes. shales, some with calcite veinlets
A few of the drill roads (no drill hold Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limey selectively grabbed from several different local noted. Intrusive with quartz phenos & pyrite	rabbit brush & have drill holes. y shales, some with calcite veinlets tties within drilled area. Some MnO dendrit
A few of the drill roads (no drill hold Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limes selectively grabbed from several different local noted. Intrusive with quartz phenos & pyrite or roads but not sampled.	rabbit brush & have drill holes. y shales, some with calcite veinlets ties within drilled area. Some MnO dendrit
A few of the drill roads (no drill hold Most of the other drill roads are overgrown with Sample 852 - Red to brown to tan limes selectively grabbed from several different local noted.
