| PROPERT NAME: Beacon Mine OTHER NAMES: Estabrook (?) | County: E1ko |
| | Mining District: Mc Dermitt |
| MINERAL COMMODITY(IES): Ba Bedded Bedded | AMS Sheet: |
| TYPE OF DEPOSIT: | AMS Sheet: Quad Sheet: Lake Mtn. 7 1/2 SW/4 5 |
| ACCESSIBILITY: | SW/4 5 , T 37N , R 51E |
| OWNERSHIP: Controlled in Aug 1980 by Peabody Calada | Coordinate (UTM): |
| PRODUCTION:25,000 to 100,000 tons | North 4 5 5 3 2 7 0 m East 9 5 6 4 3 8 0 m |
| HISTORY: | Zone +11 |
| | |
| | |
| DEVELOPMENT: NE trending area, with small upper & lower pits. | Extensive drilling in the area. |
| ACTIVITY AT TIME OF EXAMINATION: Stripping at time of exam. | |
| | 7.00 |
| GEOLOGY: The barite occurs with chert & argilli te of the | Ordovician Vinini Fm. The |
| barite appears to be present in two units separated by 20' | of unaltered chert, but the |
| exposures are poor & the unit may actually be a single hori | zon repeated by faulting. The |
| contact of the units with the chert are sharp. The units d | iffer in quality & character. White |
| barite veins occur locally. | |
| The barite is grey, fetid, laminated to thin bed Barite outcrops have been explored in other area | ded & contains minor quartz. |
| claims. The quality is similar to that observed on the Bea | s nearby on the Jones & Beaver |
| erarmo. The quartey is similar to that observed on the bea | con claims. |
