

0580 0013

149 Item 13

PROPERTY NAME: (?) Myrtle Claims  
OTHER NAMES: \_\_\_\_\_  
MINERAL COMMODITY(IES): (?) Cu, Mo(?)  
TYPE OF DEPOSIT: Igneous, veins quartz, disseminated  
ACCESSIBILITY: See topo map  
OWNERSHIP: ?  
PRODUCTION: Probably none  
HISTORY: ?

County: Lander  
Mining District: Birch Creek  
AMS Sheet: Millett  
Quad Sheet: Spencer Hot Springs 15  
Sec. 23, T 18N, R 44E  
Coordinate (UTM):  
North 4 3 6 1 9 8 0 m  
East 0 5 0 0 1 0 0 m  
Zone +11

DEVELOPMENT: Lower adit caved. Trends N60W. May have been ~ 200 feet deep. 2) Higher adit caved trends N80°W ~ 200 - 300 feet deep.

ACTIVITY AT TIME OF EXAMINATION: None. Fairly old workings

GEOLOGY: Basically almost a true granite bed probably quartz monzonite. Minor white quartz veins with Fe-staining scattered throughout. Pegmatitic material also present- mostly quartz, pink feldspar and biotite.

REMARKS: 1) Picture #23 on camera. Looking west at caved adit. Highest adit in canyon Located at head of.  
2) Location notice at mouth of adit (highest one): Myrtle #9; Location Nov. 19, 1979, Located by - Bert Horbaugh, Wendell, Idaho.  
3) Sample #754.
