area of trenches. Looks like none of the 3 trenches hit bedrock, altho trenches are somewhat sloughed in. An open cut lies to north of northern most trench. No bedrock exposed in it. Between this property & Red Ore #1 are numerous trenches & cuts, minor adits. Again surface work probably done during late 1960's - early - 1970's. Open shaft approximately 40 ft. deep located below trenches & to immediate north. Numerous fragments of basic dike on dump. A shallow trench lies north of shaft.

REMARKS: Sample #2438
