(151) Item 22

PROPERTY NAME: Lander Mine (?)
OTHER NAMES: There is some question whether this isn't Silver
MINERAL COMMODITY(IES): Pb, Ag, Au? Sides Mine.
TYPE OF DEPOSIT: Vein material along a Thrust Gouge
ACCESSIBILITY: 1/4 mile south of Indian Spring Road.
OWNERSHIP: _____
PRODUCTION: Unknown
HISTORY: _____

County: Lander
Mining District: Bullion
AMS Sheet: Winnemucca
Quad Sheet: Crescent Valley 15'
Sec. 6, T 28N, R 47E
Coordinates (UTM):
North 4 4 6 4 4 0 0 m
East 0 5 2 4 7 0 0 m
Zone 11

DEVELOPMENT: Four adits but only the lower two are accessible, big dumps, no roads.

ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY: The main adit is on a low 15 degree contact (thrust?) between the Slaven Chert and a dark gray highly fractured and folded sequence of thin shaley beds of the Valmey Formation(?)
Quartz veins have crossed the contact in places and filled fractures up to six inches in width.

Mining of the main adit to sink or raise along the 15 degree contact, which strikes approximately N and dips irregularly. Mineralization is along the contact and in the quartz veins which was sampled 683.

Photo #1

REMARKS: The mine is old, poorly timbered and left with large open areas below ground, especially along the extensive ore-shoots
From what I heard from local miners this may be the Silver Sides Mine?
