PROPERTY NAME: Little Cheif Mine

OTHER NAMES: \_\_\_\_\_

MINERAL COMMODITY(IES): Turquoise and Barite

TYPE OF DEPOSIT: \_\_\_\_\_

ACCESSIBILITY: \_\_\_\_\_

OWNERSHIP: \_\_\_\_\_

PRODUCTION: Unknown

HISTORY: \_\_\_\_\_

County: LanderMining District: BullionAMS Sheet: WinnemuccaQuad Sheet: Crescent Valley 15'Sec. 31, T 29N, R 47E

Coordinate (UTM):

North 4 4 6 1 8 5 0 mEast 0 5 2 2 0 5 0 mZone 11

DEVELOPMENT: \_\_\_\_\_

ACTIVITY AT TIME OF EXAMINATION: \_\_\_\_\_

GEOLOGY: Locally the Slaven Chert and the Valmey have been highly fractured folded and faulted. The turquoise occurs in fractures and veinlets within the cherts, shales and quartzites. Unfortunately, the turquoise is in the same host as the barite and the barite has more economic potential. As a result the Little Cheif has almost been bulldozed into oblivion, leaving some barite stockpiled in it's place.
