

0840 0009

(23) Item 9

PROPERTY NAME: Walker Mine
OTHER NAMES: Tri-State Silver Leaf
MINERAL COMMODITY(IES): Tungsten
TYPE OF DEPOSIT: Pegmatite

ACCESSIBILITY: _____

OWNERSHIP: _____

PRODUCTION: _____

HISTORY: _____

County: Clark
Mining District: Bunkerville
AMS Sheet: Las Vegas
Quad Sheet: Virgin Peak 15'
Sec. Unsurveyed 15S, R 71E

Coordinate (UTM):

North 410581155 m
East 0171611450 m
Zone +11

DEVELOPMENT: Adits along structure at top of ridge, other adits low in canyon to the east, now caved.

ACTIVITY AT TIME OF EXAMINATION: None.

GEOLOGY Northeast striking quartz-pegmatite lenses in schist, pegmatites follow foliation in schist, massive hornblend - rich dikes also follow trend of quartz pegmatite. Tourmaline present.

Scheelite is present in quartz near the pegmatite-schist contact, has blue-white fluorescence, some huebnerite(?), and clots and pods of pyrite, pale blue crystalline mineral with quartz, possibly beryl(?)
