

1050 0007

PROPERTY NAME: Sample Site 1790

OTHER NAMES:

MINERAL COMMODITY(IES): Possible uranium

TYPE OF DEPOSIT: secondary enrichment in coarse volcanics

ACCESSIBILITY: 4-5 miles on foot

OWNERSHIP: Unknown

PRODUCTION: Unknown

HISTORY:

County: Elko

Mining District: Charleston

AMS Sheet: Wells

Quad Sheet: Mt Velma 15'

Sec. NE<sup>1</sup> 7, T 44N, R 57E

Coordinate (UTM):

North 4 6 2 0 0 0 0 m

East 0 6 1 7 9 0 0 m

Zone

DEVELOPMENT: Dozer-cuts and road which maybe twenty years old and need of repair.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Mineralization is in coarse-grained, deeply weathered, iron-stained tuffs along fractures. The mineralization was prospected by dozer-cuts and where exposed it is a yellow-green secondary mineral. Nearby claim post are from the 1950's. The workings extend over an area of about a quarter-mile along the ridge of the basin.

Sample 1790
