Tompex Mining Co.

ABSTRACT OF REPORT

MAY 25 1912

309

Item 49

Country.....United States.....

State.....Nevada.....

County.....

Virginia City

Name of Mine...Emma Nevada etc.....

Kind of Deposit.....Lode.....

Valuable Metals.....Gold.....

Extent of Property.....6 claims.....

Reported on by.....No report.....Date Dec. 12, 1911.....

Financial Proposition: Statement by

Frank A. Muhlbeier
owner

None made.

Mining proposition brought in by...Frank A. Muhlbeier.....

Abstract of Report: Date May 16, 1912 By J.E.S.

Ledge over 400 feet wide; quartz; assays high in gold.

Comment: Probably nothing. Have written.

Emma Nevada Mine
File

STATEMENT FROM ALL THOSE CLAIMS MADE BY SEVERAL
ASSAYERS IN VIRGINIA, AND OTHER PLACES.

The great Emma Nevada Mine Assays made by Frank Fielding, Chief Assayer for the Consolidated Virginia Mine for 32 years.

One Assay, (\$15.30), (\$37.20), (\$59.10), (\$348.62), (\$672.00), (\$112.00), made by young Kinhead, one made by Otto Lawson, (\$76.15), one made by Lawson (\$56.00), one made by assayer Darling (\$64.00), one made by Billy Douglas (\$63) some cents, one made by Darling of (\$27.00) on the old Virginia ground, one made by Gilbert Ross, (\$23.00), one made by Ross, Superintendent of the Ophir at the time (\$72.00), several made by Ross several hundred dollars; several made by Andrew Charles; several made by Penoir, Superintendent of the Gould & Curry Mine, one of five different assay offices (\$325.00) was the lowest, the highest was (\$615.00), one of (\$425.00) (342 cents), one of (\$342) some cents, one made of (\$29.00), several made by myself from 25 to 35 cents, all gold. I have found gold which is called specimen gold went from (\$20.00) to several hundred dollars.

*from the
assays are
from the
gold of the
specimen*

One prospect made of Quartz that went several thousand dollars, and several made that went from (\$18.00) to (\$20.00) and a great many others too long to name them.

There is a great change to work all those mines. A Company can run one thousand stamps of a mill the next 25 years to come on an open level plenty of rock in sight to do it. It is the greatest layout for money men in the whole State of Nevada today. This very ledge is over 400 feet wide, and

soft milling ore altogether and ready in three weeks to run a 25 stamp mill day and night.

This place is here on the old Comstock and was discovered by myself this last 16 to 18 years ago. Anybody can come here and inspect it himself, and take samples all across the Ledge to satisfy himself. It is open for everyone to see.

I would like to see some great money men take ahold of it. I remain,

Yours truly,

Frank. A. Muhlbeier

Virginia City, Nevada.
