Consolidated Cortez Silver Mines Company

CORTEZ VIA BEOWAWE
NEVADA

1280 0005

Dec. 6, 1926.

Betty O'Neal Mines,
Betty O'Neal,
Lander Co., Nevada.

Gentlemen:-

I am very glad to take advantage of your kind offer, made through Mr. Getchell and your mill foreman, to run a preliminary flotation test on a small sample of our cyanide mill tails.

The sample is being forwarded to you today by express, in a five-gallon can. We should be glad to do all assaying in connection with the test, if you will forward the samples to us. We are particularly interested in the assay of the -200 screening, before and after flotation.

We trust that you will bill us for all expenses in connection with the test, and assure you of our appreciation of your courtesy in this regard.

Very truly yours,

J. C. Grey
General Superintendent.

CORTEZ, NEVADA,
Aug. 2, 1929

Mr. Nobel Getchell,
Betty O'Neill Mine,
Battle Mountain, Nevada.

Dear Mr. Getchell:

I returned from Colorado last night, after a very pleasant and satisfactory trip. We made Price, Utah, the first night arriving at the mine the next afternoon. We spent two days at the mine, and were back in Salt Lake Tuesday evening. Mr. Sharp is a very pleasant person to have along on such a trip, and we both enjoyed it.

He expressed a desire to stay over in Salt Lake for a few days, and I came on back without him. I believe he was planning to return to Reno by train the latter part of this week.

Naturally, I am very interested to know what his verdict is regarding the Cashin, and would appreciate hearing from you as soon as possible. If you will wire us, we will drive over any time that suits your convenience.

With best regards, I am,

Yours very truly,

G L McIntyre

OFFICE AT THE MINES

CORTEZ, NEVADA,
Nov. 17th, 1928.

Hon. Noble Getchell,
Battle Mountain, Nev.

Dear Senator:

As I told you at Reno, I am after the Western Pacific for a reduction of freight rates on concentrate and have promised to give them all our business if they will take the initiative in making a substantial reduction.

I have also told them that our costs of marketing the concentrates are so high that we are experimenting with local treatment. As a matter of fact I have Mr. E. H. Mohr, Consulting Metallurgist for the Nevada Consolidated, working on the problem now along the lines of chloridizing roast and cyanide treatment. I understand that this method is in use in Mexico on ores resembling ours and hope for some success along these lines. It might be well for you to use the same argument.

The man who now has the matter before him is Eugene Fox, V P in charge of Traffic, Western Pacific Co., Mills Building, San Francisco, Calif. I am writing him today trying to hurry matters along so a plug from you at this time will benefit.

With kindest regards, I remain,

Sincerely yours,

Frederick S. Gilbert
