

1330 0008

PROPERTY NAME: Rigsby Claims

OTHER NAMES:

MINERAL COMMODITY(IES): Mg

TYPE OF DEPOSIT: Stratabound replacement

ACCESSIBILITY:

OWNERSHIP:

PRODUCTION:

HISTORY:

County: White Pine

Mining District: Currant

AMS Sheet:

Quad Sheet: Badger Hole Spring

Sec. 7, T 12N, R 61E

Coordinate (UTM):

North 413108121210 m

East 0161519101610 m

Zone +11

DEVELOPMENT: Three shallow dozer trenches

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Mined rock is soft, very white & contains massive to coarse rhombohedral crystals of magnesite (could be deweylite or dolomite - did not take sample). The host rock is probably a dolomite or ls as the magnesite deposit grades into a grey weathered ls which outcrops on hill to the north.

REMARKS: No sample taken.
