

1340 0003

PROPERTY NAME: Silicified and jasper zones, between Sawmill and

~~XXXXXX~~ Clear Creek

MINERAL COMMODITY(IES):

TYPE OF DEPOSIT:

ACCESSIBILITY:

OWNERSHIP:

PRODUCTION: None

HISTORY:

(223) Item 3

County: Nye

Mining District: Danville?

AMS Sheet: Tonopah

Quad Sheet: Danville 7 1/2

NE/4?

Sec. T 11N R 48E

(unsurveyed location approximate)

Coordinate (UTM):

North | | | | | m

East | | | | | m

Zone

DEVELOPMENT: Possibly a few prospect pits.

ACTIVITY AT TIME OF EXAMINATION: Unknown, not visited.

GEOLOGY: This area is described in Kleinhampl and Ziony (in press) as areas of silicified limestone and conglomerate which have been prospected between Clear Creek and Sawmill Canyon. W.P. Johnston (oral communication, Aug 1980) has looked for these areas and has been unable to find them. He reported that Freeport Minerals staked the area, possibly without examining the geology. No recent work is known to have been done. This area was not examined during this study.

Not posted to map. Area too large and general.

REMARKS:
