NAME OF PROPERTY

Blue Jay Group

Mrs. Agnes Horn - owner  
Delamar, Lincoln County, Nevada

167  
Item 5

LOCATION

Unsurveyed Ferguson (Delamar) Mining District, Lincoln County, Nevada, about 30 miles from Caliente.

GEOLOGY

A mineralized brecciated zone averaging about 5 feet in width along a fault fissure in quartzite. Brecciated quartz encased in oxides of iron and manganese carrying gold and silver.

DEVELOPMENT

Development work consists of two shafts, each about 15 feet deep and an adit tunnel about 525 feet long. Two winzes of undetermined depth have been sunk below the floor of the adit tunnel. At a distance of about 330 feet from the adit portal a small stope had been started, from which several cars of ore had been mined and shipped.

Mineralization submarginal in grade and too irregularly distributed to constitute commercial ore.
