Map No. 4

Mine Name: Apex Limestone Quarry (U.S. Lime Products Division of the Flintkote Co.)

MILS Sequence No.: 3200300061

Location: NW1/4 Sec. 26, T 18 S, R 63 E

County: Clark

Commodity: Limestone

Production: The Nevada Bureau of Mines and Geology reported that production from the quarry averages over 500,000 tons annually. This generally agrees with U.S.B.M. records for 1971-1975.

Mining District: Dike(?)

Geology: The quarry lies in a group of low hills composed of limestone and dolomite of Devonian and Missippian Age. Production comes from upper member of the Sultan Limestone (Devonian).

The limestone contains less than 2 percent combined $\text{SiO}_2$, $\text{Fe}_2\text{O}_3$, and $\text{MgCO}_3$.

Development: The operation includes a crushing and calcining plant in addition to the quarry.

Period of Activity: The property is currently active.
