Map No. 5:

Item 12

Mining District: Don Dale

Mine Name: Andies mine

MILS Sequence No.: 3201700063

Location: Sec. 36, T. 4 S., R. 55 E.

SE of 176

County: Lincoln

Commodity: Mercury

Production: Two flasks were produced in 1955.

Geology: Rocks exposed near the claims are chiefly Tertiary andesite and rhyolite flows underlain by limestone. Ore consists of disseminated crystals of cinnabar localized in fractured and altered volcanic rocks.

Development: The workings include a 31-foot vertical shaft, 140-foot inclined adit, over 5,200 feet of drill holes, and numerous pits and trenches.

Periods of Activity: Mercury was discovered in 1919 and the claims were located in 1955; exploration and development work was done in 1955 and 1956.

References: (Tschanz and Pampeyan, 1970, plate 1; Gentry and Stager, 1957).
