

1560 0004  
PROPERTY NAME: Raser & Reeder Mines

OTHER NAMES: Not Known

MINERAL COMMODITY(IES): Au, Ag

TYPE OF DEPOSIT: Quartz veins in granodiorite

ACCESSIBILITY: See topo sheet

OWNERSHIP: Not known

PRODUCTION: Small, + \$90,000

HISTORY: See Lincoln, 1923 & Vanderburg, 1938

County: Humboldt <sup>(126)</sup> ~~Idaho~~ 5

Mining District: Donnelly

AMS Sheet: Vya

Quad Sheet: Division Peak 7 1/2'

Unsurveyed 37, 24  
Sec. 20, 1, R 37

Coordinate (UTM):

North 4 5 5 0 5 6 0 m

East 0 3 0 8 6 8 0 m

Zone 11

DEVELOPMENT: Several adits & small pits scattered over 2 1/2 mile in a North-south direction. Total workings will amount to several hundred feet mostly underground. Most all adits caved.

ACTIVITY AT TIME OF EXAMINATION: None & has been none for along time.

GEOLOGY: Diabase country rock with mineralization occurring in heavily Fe-stained white quartz veins. Fair amount of pyrite observed on dump material.

See Lincoln & Vanderburg.

REMARKS: Sample # 2406. Picture #7 on camera looking W-NW at larger of workings in district.  
(May be Reeder Mine?)
