

1610 0006
PROPERTY NAME: Sample Site 2953
OTHER NAMES: Bobby Mine
MINERAL COMMODITY(IES): Gold/Silver
TYPE OF DEPOSIT: Qtz veins
ACCESSIBILITY: Very bad road west of the entrance of
Dyke Canyon.
OWNERSHIP: Robinson Industries and Assoc. of Aurora
Colo.
PRODUCTION: Unknown
HISTORY: Sometime in the early 1900's

County: Humboldt Item 27
Mining District: ~~Near~~ Dyke Hot Spr.
AMS Sheet: Vya
Quad Sheet: Duffer Peak 15'
Sec. 26, T 43N, R 30E
Coordinate (UTM):
North 4 6 0 3 1 0 0 m
East 0 3 6 7 6 0 0 m
Zone 11

DEVELOPMENT: Several shallow adits

ACTIVITY AT TIME OF EXAMINATION: Staked on 9-6-84

GEOLOGY: All of the workings in this area are along faults where qtz-brecciated veins have intruded meta-andesites. The adit from which sample 2953 was taken bears N80W, 60S. The vein is highly oxidized and gossan-like near the surface. Sample was taken from the dump and exposed vein near the adit. Mineralization included; iron oxides with some pyrite and arsenopyrite (?)
