PROPERTY NAME: Oxide Claims(?)
OTHER NAMES: -
MINERAL COMMODITY(IES): Ag (Cn, Spec, hematite)
TYPE OF DEPOSIT: Shear zone in limestone
ACCESSIBILITY: Road down Pleasant Valley. See BLM 1: 62000/
Tippett Sheet.
OWNERSHIP: Paul Zakis
PRODUCTION: ? probably some.
HISTORY: ?? Proof of labor notice filed for 1979.

County: White Pine Item 23
Mining District: Tungstonia
AMS Sheet: Ely
Quad Sheet: Skinner Canyon 7 1/2
Sec. SW/4 18, T 21N, R 70E
Coordinate (UTM):
North 4 3 9 7 5 0 0 m
East 0 7 4 7 8 0 0 m
Zone +11

DEVELOPMENT: Vertical shaft approximately 50 feet deep - maybe more. Inclined shaft & a
section incline running obliqued to the first.

ACTIVITY AT TIME OF EXAMINATION: None. Larger incline partly covered. Has iron rail with ore bin at
top.

GEOLOGY: County rock appears to be two different units. One a dark grey, the second a
white buff color. White milky quartz in and around ore bin contain slight amount of Fe
oxide.
6 Location of Sayeed. See his description in text for what he saw.
