

NAME OF PROPERTY**Tungstonia**

Ely Gold Mining Company, Ely, Nevada } owners  
Harry W. Parker, Ely, Nevada }

Tungsten Minerals Company - lessee  
Joseph M. Eccles, 302 David Eccles Building, Ogden, Utah, President

LOCATION

Section 27, Township 21 North, Range 69 East. Regan Mining District, White Pine County, Nevada, 65 miles east of Cherry Creek, Nevada, via country road. Elevation 7800 to 8500 feet.

GEOLOGY

The rock formation is granite, traversed by 5 quartz veins ranging in width from 6 inches to 3 feet wide. Crystalline aggregates of hubnerite occur sporadically distributed in the quartz.

DESCRIPTION OF PROPERTY

Principal work done has been through 2 tunnels - 280 and 550 feet long, both driven on the vein. The 280 foot tunnel is a cross-cut and did not reach its objective. The 550 foot tunnel was driven on the vein and about 3500 tons of ore extracted and milled.

The U. S. Bureau of Mines made a number of diamond drill holes and an estimate of tonnage ranges up to 20,000 tons of .5%  $WO_3$ .
