

1710 0024

(27) Item 24

PROPERTY NAME: Nevada Gold Co. Claims

OTHER NAMES:

MINERAL COMMODITY(IES): Au

TYPE OF DEPOSIT:

ACCESSIBILITY: See map, road good

OWNERSHIP:

PRODUCTION: Unknown

HISTORY: Unknown

County: Clark

Mining District: Eldorado

AMS Sheet: Kingman

Quad Sheet: Nelson 15'

Sec. 32, T 25S, R 64E

Coordinate (UTM):

North	3	9	5	4	7	0	0	m
East	0	6	9	3	9	5	0	m
Zone	+11							

DEVELOPMENT: The shaft and adit shown on the map has been expanded several acres of surface exploration with numerous shafts, adits, pits and trenches, with probably over 1,000 feet of underground workings.

ACTIVITY AT TIME OF EXAMINATION: None, but above described workings has been done within the last 3 years

GEOLOGY: workings follow a south trending shear zone with almost vertical dip in silicified, propylitized andesite. Rocks heavily FeOx stained and jarosite occurs along fracture surfaces along with euhedral quartz crystals. Andesite weathered, bleached, coated with MnO<sub>2</sub>, and exhibiting fine grained boxworks. Rocks show minor brecciation with cockscomb quartz cementing fragments and infilling fractures.

REMARKS: Sample Site 1308
