

1780 0045  
PROPERTY NAME: RICHMOND MINE

OTHER NAMES:

MINERAL COMMODITY(IES): Ag?, Au? Pb, Cu.

TYPE OF DEPOSIT: Hydrothermal (Replacement)

ACCESSIBILITY: South from the center of Eureka via  
paved an dirt Roads approx two miles.

OWNERSHIP:

PRODUCTION:

HISTORY:

County: Eureka Item 46

Mining District: Eureka

AMS Sheet: Ely

Quad Sheet: Eureka 15'

Sec. 22, T 19N, R 53E

Coordinate (UTM):

North 4372880 m

East 0586400 m

Zone 11

DEVELOPMENT: Very large shaft which was closed, headframe, hoist house, roads fair,  
very large dumps on steep northside of Ruby Hill.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Geology in the vicinity of the shaft is almost entirely the Hamburg  
Dolomite that is cut by major N.W and N.E. faulting. The shaft is just  
northeast of the Ruby Hill Fault, which it cuts through in the subsurface  
The size of the dumps are measure of the 1200 ft. Richmond Shaft, Photo  
#34. Sample #389 was selected from a cross section of vein materials on  
the dumps.
