

1790 0014

(227) Item 14

PROPERTY NAME: Sample Site 2091  
OTHER NAMES: \_\_\_\_\_  
MINERAL COMMODITY(IES): Cu, Pb, Zn, Sb  
TYPE OF DEPOSIT: Vein  
ACCESSIBILITY: Fair to poor access north of Pole Line road.  
OWNERSHIP: Unknown  
PRODUCTION: Unknown  
HISTORY: Older working from the 1900's

County: Nye  
Mining District: Fairplay  
AMS Sheet: Tonopah  
Quad Sheet: GRanny Goose Well 7 1/2  
Sec. Unsur., T 10N, R 36E  
Coordinate (UTM):  
North 4 2 8 6 6 2 0 m  
East 0 4 2 0 6 0 0 m  
Zone \_\_\_\_\_

DEVELOPMENT: A single shaft with many prospects, some drilling was last activity

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Locally the host rocks are a highly silicified rhyolite tuffs. The shaft was sunk with a hand windlass on narrow altered zone of silica and vein material with visable mineralization consisting of minor copper, iron and manganes oxides. Drilling in the area was within the last few years?
