

1800 0025  
PROPERTY NAME: Sample Site 3820  
OTHER NAMES: Ajax Vein  
MINERAL COMMODITY(IES): Silver/gold  
TYPE OF DEPOSIT: Epithermal vein  
ACCESSIBILITY: On foot .6 mile south of Mizpah Canyon  
OWNERSHIP: Unknown  
PRODUCTION: Unknown  
HISTORY: Looks to have been part of the 1906-1910 exploration.

County: Churchill *Den 32*  
Mining District: Fairveiw  
AMS Sheet: Reno  
Quad Sheet: Bell Canyon 7-1/2'  
Sec. 31, T 16N, R 34E  
Coordinate (UTM):  
North 4 3 3 9 4 0 0 m  
East 0 3 9 7 6 5 0 m  
Zone +11

DEVELOPMENT: Several shallow and one main adit on the Ajax Vein.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: The Ajax Vein has been explored by a series of minor prospects, mostly shallow adits, along its strike. A single 100-foot long adit cross-cuts the vein but there is no evidence of mining and the vein, where exposed, seems barren. Sample 3820 was selected from the dumps and contained the best looking vein material present there. Assays showed only minor mineralization.
