

1840 0011
PROPERTY NAME: Bisoni Fluorspar Deposit
OTHER NAMES: McCulloughs Butte Property
MINERAL COMMODITY(IES): Fluorite, Beryl
TYPE OF DEPOSIT: Skarn

ACCESSIBILITY: _____

OWNERSHIP: Maynard Bisoni, Eureka, NV

PRODUCTION: None

HISTORY: Located by Bisoni for fluorite, explored by
Union Carbide by Be & W for US Borax, ASARCO, Bear Creek
for fluorite.

County: Eureka

Mining District: Fish Creek

AMS Sheet: Millett

Quad Sheet: Bellevue Peak

23,24,25,26 18N 52E
Sec. 19,30 T 18N R 53E

Coordinate (UTM):

North 4 3 6 2 5 0 0 m

East 0 5 8 0 5 0 0 m

Zone +11

DEVELOPMENT: Several cuts, two adits (caved) trenches

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Skarn mineralization in Pogonip Group limestone, skarn formation, intensity
generally zoned around an inferred Cretaceous porphyry intruded in area beneath
McCullough Butte Fluorite-muscovite veins along and crosscutting bedding, in Pogonip
beneath capping of Eureka Quartzite. Beryl crystals seen in cuts on Ditto Peak. Scheelite
present in adits on the lower west flank of Ditto Peak.

REMARKS: Sample of BeO-muscovite veins taken
Sample #2010

REFERENCES: Barton, Mark, (see attached maps)

EXAMINER: J. Tingley

DATE VISITED: 9/25/83
