

1910 0036

PROPERTY NAME: Downeyville Mine  
OTHER NAMES: \_\_\_\_\_  
MINERAL COMMODITY(IES): Lead-Silver-Zinc minor gold.  
TYPE OF DEPOSIT: Replacement

ACCESSIBILITY: Good roads lead to the camp from several different directions.

OWNERSHIP: The Downeyville Nevada Mines

PRODUCTION: \$80,000 official but thought to be much more

HISTORY: The mine was operating in 1875 and had its best production from 1875-1887 but operated intermittently until the 1930's.

County: Nye  
Mining District: Gabbs  
AMS Sheet: Tonopah  
Quad Sheet: Paradise Peak 15'  
Sec. 11, T 12N, R 36E

Coordinate (UTM):

North 4307500m

East 0422000m

Zone \_\_\_\_\_

DEVELOPMENT: About 10 shafts half-dozen adit, but records of the underground are not available.

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Very large replacement ore bodies in limestone at what was apparently referred to as "Carbonate Point". The camp has a long history much of which has been lost or was unaccounted including the details on the underground activities, workings, ore bodies etc. Sample 3173 was collected from the big dumps at the site of the large shaft, which included zinc-lead-silver, tetrahedrite, chalcopyrite, pyrite...
