

Mining District: Wellington (Old Jamestown, O'Briens)

Mine Name: Hammel (Guy Puh property, Franz Hammel mine)

MILS Sequence No.: 3202300179

Location: Sec. 34, T. 4 S., R. 45 E. North of 230

County: Nye

Commodity: Gold, silver, copper

Production: None reported

Geology: Rhyolite and andesite are cut by a quartz vein averaging from a few inches to a foot or more in thickness. The vein has been brecciated and the interstices filled with calcite and limonite. In the oxidized portion, the ore contains free-milling gold with a little silver; in the sulfide zone, the ore contains gold associated with pyrite.

Development: The workings consist of a 30-foot inclined shaft and a 150-foot vertical shaft.

Periods of Activity: Locations were made in the late 1920's and early 1930's. It was active in 1946 and 1947.
