Map No. 10

NYE COUNTY
(SW)

Item 44

Mine Name: Pius Kaelin group

MILS Sequence No.: 3202300312

Location: Sec. 34, T 4 S, R 45 E

County: Nye

Commodity: Lead, Gold, Silver

Production: Small, unknown amount; no record in U.S.B.M. files.

Mining District: Gold Crater

Geology: Galena and cerussite occur in brecciated, pipe-like zones.

Mining ore reportedly contained 10 percent lead, 14 to 24 ounces silver and \$8 to \$12 gold (\$35/ton) per ton. Possibly mineralized altered rocks extend beneath the Thirsty Canyon Tuff adjacent to the mining area (13).

Development: The workings reportedly consist of a 20-foot inclined shaft and a 30-foot shaft with minor laterals.

Period of Activity: Apparently the property was operated after World War II.

Other: Mine run ore was apparently shipped to a small two-stamp and gravity mill at Stonewall Spring, 24 miles by road, west of the mine.
