SOUTHWESTERN MINES COMPANY

OFFICERS

THOS. THORKILDSEN.	- - - - -	PRESIDENT.
S. H. BRADY,	- - - - -	VICE-PRES. AND GENERAL MANAGER.
C. F. STEVENS,	- - - - -	SECRETARY AND TREASURER

THIS LETTER BRIEFLY DESCRIBES THE CONDITION OF THIS COMPANY'S PROPERTY AND POSSIBILITIES AS SEEN BY S. H. BRADY, E. M., FORMERLY MANAGER OF THE TONOPAH BELMONT DEVELOPMENT COMPANY AND OF THE WEST END CONSOLIDATED MINING COMPANY, OF TONOPAH, AND J. K. TURNER, E. M., CONSULTING ENGINEER FOR THE JUMBO EXTENSION MINING COMPANY, OF GOLDFIELD, NEVADA.

MINES:
HORNSILVER, NEVADA.

MAIN OFFICE:
GOLDFIELD, NEVADA.

SOUTHWESTERN MINES COMPANY

GOLDFIELD, NEVADA, JUNE 24, 1915.

We call your attention to the property of the Southwestern Mines Company.

Operations of the Southwestern Mines Company will be conducted under the personal direction of Mr. S. H. Brady, who, as Manager of the Tonopah-Belmont Development Company and the West End Consolidated Mining Company, successfully brought the properties of those corporations to a dividend-paying basis. The substantial production already made from development of limited scope and a thorough sampling of ore in sight establish the value of the property of this company beyond question.

ORGANIZATION:

This company is organized under the laws of the State of Nevada and capitalized for 1,250,000 shares of non-assessable stock, par value \$1.00 per share. We now offer the public the opportunity to purchase a block of the Treasury stock at 25c per share.

LOCATION AND AREA:

This mine is located at Hornsilver, Esmeralda County, Nevada, 28 miles southwest of Goldfield, and 16 miles from Stonewall Siding on the Las Vegas & Tonopah Railroad. The area of the property is 135 acres.

TITLE:

The title to the property is held by location, the property now being in the process of patenting, and it is our intention to shortly complete this work. There is absolutely no chance of an apex suit ever being brought against this company by any adjoining property, because this company has the apex of the vein well within its property lines.

PRODUCTION:

This property has produced some 6,000 tons of ore, of a value of \$25.00 per ton, gross production \$150,000.00, shipments being made to smelters and local mills at high rates. It was then found that a mill was necessary in order to realize a good profit on ore in sight, and production was suspended pending purchase by present owners and building of a mill, which will greatly increase the company's earnings.

VEIN:

The average width of the vein is from five to twenty feet. The vein can be traced throughout the entire length of the property, for about 4,000 feet, and is developed to a depth of 400 feet.

MILLING ORE:

Careful estimates of the milling ore now in sight show a total value of approximately \$250,000.00, which can be mined and milled at a handsome profit. A carefully prepared report has been made on this company's property by Mr. J. K. Turner, who has so successfully developed the Jumbo Extension into a paying mine, and Mr. S. H. Brady. A copy of this report will be gladly furnished upon request to anyone desiring same.

MILLING PLANT:

It is the intention of this company to build a 50-ton mill immediately, and have it in operation and

producing bullion in the near future. This mill should not cost to exceed \$40,000.00, and it can be so constructed that it can be easily enlarged later, without in any way interfering with the operation of the first 50-ton unit.

WATER:

Water will be piped from the pine line of the Goldfield Consolidated Water Company, from a point in Lida Canyon to Hornsilver, a distance of eight and one-half miles, the Water Company assuming the expense of this pipe line and furnishing water to the Southwestern Mines Company at a reasonable rate.

CHARACTER OF ORE:

This is a silvergold mine, the silver values being in chlorides and bromides, the gold values being free gold. Silver values predominate in the upper levels, while on the lower levels the gold values are greater. The ore is easily and cheaply mined and can be milled by the cyanide process, an extraction of above 90 per cent being easily made. *The prospect of developing new and greater ore bodies is very favorable.*

ORDERS FOR STOCK:

Orders for stock may be placed with any broker, or subscriptions may be sent to John S. Cook & Co., Bankers, of Goldfield, or direct to the company's office in Goldfield. Certificates will be forwarded promptly upon receipt of orders accompanied by remittance at the rate of 25c per share. *Prompt action in placing orders for this stock is recommended, as the condition of the property warrants the prediction that the resumption of operations will soon place it in the front of Nevada's producing mines, with an equal degree of certainty that the stock will advance materially in price. Investors in stock of this company may rest assured that the operations will be conducted in an efficient and economical manner, in an endeavor to shortly place the company in the list of dividend payers. We are firm in our belief that an opportunity such as this has seldom been offered the investing public.*

SOUTHWESTERN MINES COMPANY,

S. H. BRADY,

Vice President and General Manager.

C. F. STEVENS,

Secretary and Treasurer.

John S. Cook & Company, Bankers, or
Southwestern Mines Company,
Goldfield, Nevada.
