

2120 0030

PROPERTY NAME: GR Claims

OTHER NAMES: EGR rotary drill holes

MINERAL COMMODITY(IES): Unknown, probably Au

TYPE OF DEPOSIT:

ACCESSIBILITY:

OWNERSHIP: Exxon Corp. (1984)

PRODUCTION: None.

HISTORY: Recent drilling south of the Adelaide mining area.

County: Humboldt Hem 32

Mining District: Gold Run

AMS Sheet: Winnemucca

Quad Sheet: Adelaide 7 1/2'

S/2 S31, T34N, R40E

N/2Sec. 6, T 33N, R 40E

Coordinate (UTM):

North 4 5 1 3 2 3 0 m

East 0 4 5 6 2 5 0 m

Zone +11

DEVELOPMENT: Several km of drill roads; several rotary drill holes

ACTIVITY AT TIME OF EXAMINATION: None, but drilling was done very recently.

GEOLOGY: According to Willden (1964) the rocks of the Adelaide district, including the explored area here, are limestone and shale of the Preble Formation. The recent exploration by Exxon is presumably for disseminated precious metals.

REMARKS: Sample 2901 is a grab of drill-cuttings from the ground around one abandoned drill hole.

REFERENCES: Willden, 1964.

EXAMINER: L.J. Garside

DATE VISITED: 30 Sep 84
