

NAME OF PROPERTY

2280 0015

Elko Co.

Star Tungsten Mine

Item 28

E. Lane, A. W. Francis, George F. Ogilvie - owners
Elko, Nevada

LOCATION

Humboldt National Forest, Elko County, Nevada, about 56 miles from Elko.

GEOLOGY

Tungsten-bearing garnetite irregularly occurring at the contact of steeply dipping limestone beds and a large granite intrusive, which intrusive to the west forms the main core of the Ruby Range. Granite-lime contact complicated by innumerable faults and minor slips. Values are spotty.

DEVELOPMENT

Several very shallow shafts and an adit tunnel about 80 feet long, from which a few hundred tons of ore have been mined and milled at a small concentrating plant on the property.

Ore reserves: Several hundred tons which might average 0.75% WO_3 .
