

2320 0008

PROPERTY NAME: Kimberly Consolidated

OTHER NAMES: (Philadelphia Western)

MINERAL COMMODITY(IES): Au, Ag, Cu, Pb

TYPE OF DEPOSIT: Quartz vein

ACCESSIBILITY: See map - road good

OWNERSHIP:

PRODUCTION: &lt; \$100,000

HISTORY:

DEVELOPMENT:

ACTIVITY AT TIME OF EXAMINATION: None

GEOLOGY: Single adit, partially caved, trending due west in alluvium and gently westward dipping quartz and shaley mudstone. Approximately 500(?) feet of working with standing water. Old bins and cylinder laying around. Fine-grained pyrite veinlets cut quartzite and coat fractures, highly altered intrusive (granitic) in float crystalline barite randomly distributed, pyrite cementing breccia, galena & pyrite also in intrusive. Entire hilltop canyon in vicinity drilled and dozed.

REMARKS: Sample 664 A- Quartzite, B - Intrusive
