PRODUCTION: 18 Cast		Coordinate (UTM):
ACTIVITY ATTIME OF EXAMINATION: None SECTION Dump rock is composed of very white, marbelized limestone and dense, silicated tact: Tactite consists of irregular epidote-garnet-calcite lenses with scattered pods of hemai and sulfides. Dense, dark green skarn contains these same minerals in fine disseminate flecks. Granodiorite/diorite float is on hillside above dump. Intrusive rock comprises the top of Diamond Peak. Sample 432- Tactite with hematite, pyrite, chalcopyrite and CuOxs. Minor scheelite Larry R2 - #20 - North veiw, white dump, sample 432.		0500500
ECTIVITY ATTIME OF EXAMINATION: None ACTIVITY ATTIME OF EXAMINATION: None SECTION Dump rock is composed of very white, marbelized limestone and dense, silicated tact: Tactite consists of irregular epidote-garnet-calcite lenses with scattered pods of hemat and sulfides. Dense, dark green skarn contains these same minerals in fine disseminates flecks. Granodiorite/diorite float is on hillside above dump. Intrusive rock comprises the top of Dismond Peak. Sample 432- Tactite with hematite, pyrite, chalcopyrite and CuOxs. Minor scheelite Larry R2 - #20 - North veiw, white dump, sample 432.		1.17
ACTIVITY AT TIME OF EXAMINATION: None SECTION DUMP POCK is composed of very white, marbelized limestone and dense, silicated tact: Tactite consists of irregular epidote-garnet-calcite lenses with scattered pods of hemat and sulfides. Dense, dark green skarn contains these same minerals in fine disseminated flecks. Granodicrite/dicrite float is on hillside above dump. Intrusive rock comprises the top of Diamond Peak. Sample 432- Tactite with hematite, pyrite, chalcopyrite and CuOxs. Minor scheelite Larry R2 - #20 - North veiw, white dump, sample 432. REMARKS:	MARION AND AND AND AND AND AND AND AND AND AN	2010
Dump rock is composed of very white, marbelized limestone and dense, silicated tact: Tactite consists of irregular epidote-garnet-calcite lenses with scattered pods of hemal and sulfides. Dense, dark green skarn contains these same minerals in fine disseminate flecks. Granodiorite/diorite float is on hillside above dump. Intrusive rock comprises the top of Diamond Peak. Sample 422- Tactite with hematite, pyrite, chalcopyrite and CuOxs. Minor scheelite Larry R2 - #20 - North veiw, white dump, sample 432.	DEVELOPMENT: 1 caved, N60E adit exploring contact zone between limestone and intrusive.	
Sample 432- Tactite with hematite, pyrite, chalcopyrite and CuOxs. Minor scheelite Larry R2 - #20 - North veiw, white dump, sample 432.	ACTIVITY AT TIME OF EXAMINATION: None
