1936

IRON HAT DISTRICT  
ALDRICH DISTRICT

On the east slope of the Tobin Range, 22 miles southwest of Valmy

Several carloads of lead-silver ore averaging \$38.90 per ton shipped by the IRON HAT CORPORATION in 1910. A few years ago eight unpatented claims acquired by the CONSOLIDATED MINES CORPORATION OF AMERICA: They drove a tunnel about 1800 feet long which cut two veins at depth. 800 feet of drifting on the two veins but only one car of ore shipped which averaged \$32 per ton (42 ounces of silver @ 32¢/ounce and remainder lead at 3¢ per pound.)

The formation is in limestone and the veins are the replacement type. Values are in lead and silver. Average width of vein 3 feet and dip 60 degrees.
