MASON VALLEY MINES COMPANY

GENERAL OFFICE AND SMELTER AT THOMPSON, NEVADA

G. A. KERVIN, General Manager

MINE AND MILL OFFICE
MASON, NEVADA

Thompson, Nev.
November 9, 1927.

Mr. Noble Getchell,
Battle Mountain, Nev.

Dear Getchell:

Mr. L. K. Kramer of Golconda, whose property lies between the Highway and Iron Point, has appealed to me to assist him in attracting an operator to his ground who might proceed with development at a rate which would accomplish something.

It occurs to me that operating in this area as you are, you could investigate the property at very little expense.

Unfortunately, I have not sampled the principal exposures for their value as a milling proposition, but know that the quantity of shipping ore produced from the meager development has been substantial and recommends the ground for careful scrutiny.

Kramer and I have been friends for years, and I believe he would heed any advice I might give him as to terms; therefore, should you visit the property, decide that it is worthy of development, but can not procure logical terms from Kramer, let me know and I shall try to straighten him out.

Have been pleased to hear from time to time encouraging reports from both the Betty O'Neal and the Gold Circle properties, and trust both of these operations are in healthy condition.

With kindest personal regards to yourself and
Mrs. Getchell, I am

Yours truly,

J. B. Brumley
