UNITED STATES BUREAU OF MINES

Item 6

PRELIMINARY EXAMINATION REPORT

State Nevada County Humbolt Mineral Products Copper

Name of property New Northern Light Mine

Owner Harrison Grove Address Denio, Oregon

Lessee or
Operator _____ Address _____

Location On Jackson Creek on west side of Jackson Mt. reached

No samples reported as having
been taken.

Examined Sept. 1943

History and production No record of production but mine workings would indicate a
production of not more than 500 tons.

Type Deposit (Geology) A contact metamorphic deposit along a contact of andesite dike
and sediments, mainly limestone. Ore body occurs as a large pod along the contact.
Oxidized copper minerals are noted on upper level with sulfides increasing at depth.

Mine Workings More than 2,000 feet of development drifts, raises, winzes, etc. have
been driven from three adit levels. A winze, filled with water, was sunk in ore 65 feet
below the lower level (so it is reported).
