NEVADA
PERSHING COUNTY

Vanderburg 1936

JERSEY DISTRICT

43 miles southwest of Battle Mountain on the Pershing-Lander County line. Discovered in 1874, and in 1875 500 tons of silver-lead ore shipped to smelter at Oreana. Later a small smelting furnace erected but no good because of lack of flux.

JERSEY VALLEY MINE produced considerable shipping ore from 1880 to 1910. From 1921-1929 small shipments made to smelter from REX GROUP and the JERSEY VALLEY.

Formation is quartzite and porphyry, and ore is argentiferous galena and lead carbonate.

CINNABAR has been found in Jersey Valley about 55 miles southwest of Battle Mtn. The RUBY GROUP of QUICKSILVER MINES CO.

Note: The only Ruby mine and this company is not in this valley, but to the southeast in Lander County.
