DEVELOPMENT: Adit low on east slope of hill, caved but water so and small stope open, remains of air pipe ore chute between	eeping from opening, upper portal
and small stope open, remains of all pipe ofe chute between	oon upper and lover dumps
None.	een upper and lower dumps.
ACTIVITY AT TIME OF EXAMINATION:	
GEOLOGY: N55° E, near vertical, shear zone in shaley argi	llite, zone 2'-3' wide, dark,
cinn-brown gossan lenses, 6"-8" wide, on both walls, cen	tral portion brecciated wall rock
with gossan clots. Bedding approx. N50W, 60°W dip but for	
upper portal. Shear zone can be traced, on surface by a	iteration, to southwest for at
least 1000'. Zone has recently been drilled, cuttings possible to the southwest of the upper portal.	iles remain on drill road cut on
order to the botthwest of the appel portar.	
Oxidized vein material on dump, gossan with cerrussite,	galena, sphalerite, pyrite.
REMARKS: Sample 2684
